The Role of Agent Virtual Terminals in a Contemporary Context

The virtual terminal market is projected to reach $176.52 billion by 2030, growing at 22.3% annually. With 70% of consumers preferring digital payments, businesses need flexible payment solutions.

Agent Virtual Terminal enables transactions across all devices - from smartphones to computers. This accessibility helps organizations capture more sales and serve customers better while giving small businesses enterprise-level payment tools without the high costs.

Historical Context and Modernization

From basic card-not-present systems in the 1990s to PayPal's peer-to-peer innovation in 1998 and mobile solutions by Stripe in the early 2010s, today's Agent Virtual Terminal is so much more than just payment processing - offering omnichannel payments, business analytics, accounting integration, and inventory management.

Features of Agent Virtual Terminal Solution from E-Complish

Transform your payment operations with our comprehensive NACHA and PCI DSS–compliant solutions:

PayLink

Whether through a quick text, email, chat, or automated call, your team can instantly generate and deliver secure payment links that customers trust.

AutoAssistant

Let intelligent automation handle your payment collections and reminders 24/7. Schedule automated calls to connect with customers at their most responsive times, capture payments, and deliver account reminders professionally – all without agent intervention.

CallSentry

Our intelligent three-way calling lets your agents stay connected while our automated assistant silently captures secure card details. Customers enter their payment information privately, keeping sensitive data protected from representatives.

eDocSign

Merge document signing and payments into one seamless process. Pre-populated forms and direct payment integration simplify complex transactions.

EBPP

Electronic Bill Presentment and Payment Solution.
Send invoices instantly through our Agent Virtual Terminals via text, email, or online chat. Eliminate paper processes, reduce costs, and get paid faster – typically same-day.

Agent Virtual Terminal + Point of Sale (POS)

Take any payment with Dejavoo terminals that process EMV, Tap, and Swipe transactions. Process service fees in a single step and choose your connectivity method to keep business flowing.

Agent Virtual Terminal Integration

Our web-based Virtual Terminal connects to your systems through custom APIs and data files. Access tools anywhere with robust security and automatic data sync.

Reporting Tool

A robust, customizable reporting tool tailored to your reconciliation needs. Access on-demand reports covering both current and historical data, offering detailed insights into processing information.

And so much more!

Who Should Use Agent Virtual Terminal Services

Agent Virtual Terminal handles recurring payments for service businesses, streamlines collections for government, financial, and insurance institutions, simplifies healthcare billing and unifies retail payment systems. However, it's not limited to these sectors – through the Agent Virtual Terminal, any organization can integrate their existing systems with payment processors via a single API.

About E-Complish

With over 20 years of experience, E-Complish's Virtual Terminal provides modern, efficient payment processing backed by dedicated support staff. Our innovative platform streamlines transactions, allowing businesses to focus on growth while adapting to their evolving needs.
